SUMMARY

Dedicated IT and Security Engineer with a proven track record spanning 3 years. Proficient in network administration, system troubleshooting, and security maintenance, with a robust background in cloud infrastructure, virtualization, and basic scripting languages. Aiming to transition into a dynamic DevOps role, leveraging skills in optimizing IT and Security operations to deliver innovative solutions and foster business growth. Committed to staying at the forefront of technology trends and continuous self-improvement.

EXPERIENCE

Cyber Security Engineer

Bulwarx

January 2024 - Present

- Deployed and configured security applications, enhancing cybersecurity for diverse clients. Utilized extensive knowledge of infrastructure dependencies for seamless integration.
- Demonstrated expertise in networking protocols, contributing to the implementation of security solutions.
- Utilized REST APIs to ensure smooth data exchange and interoperability, contributing to seamless integration of security applications within client environments.
- Implemented cryptographic solutions to fortify data protection, achieving enhanced confidentiality and integrity through encryption and digital signatures.
- Contributed to the development and enforcement of security policies, ensuring compliance with industry standards and regulations. Achieved a strengthened security posture for clients through the implementation of effective security policies.
- Provided technical support during application deployment, collaborating with client teams to address concerns and optimize performance.

Technical Operations Engineer

Google Cloud

January 2022 - July 2023

- Supported the successful transition of on-prem VMWare servers migration to GCP, achieving seamless integration and optimal performance. Provided complex networking, architecture, and security solutions during the migration, ensuring a secure and efficient cloud environment.
- Led and managed a remote team of 5 engineers, overseeing the support of multiple technical projects. Achieved project milestones and maintained high team efficiency through effective communication and collaboration.
- Demonstrated expertise in GCP/AWS services, networking, and security. Implemented robust cloud solutions, optimizing infrastructure and enhancing overall system resilience.
- Responded to and mitigated cloud security alerts across AWS & GCP, ensuring a proactive and secure environment. Implemented strategies to enhance security posture and minimize vulnerabilities across multiple cloud platforms.
- Exhibited a rapid learning curve for new products and technologies, staying abreast of industry advancements. Achieved proficiency in implementing cutting-edge solutions through continuous learning and adaptation.
- Provided technical information and solutions to employees across all departments, tailoring explanations based on their technical abilities. Enhanced cross-departmental collaboration by simplifying complex technical concepts, fostering better understanding and adoption of technology.

IT Engineer

Siemplify

April 2021 - January 2022

- Enhanced server and network security by implementing proactive monitoring and regular maintenance, ensuring optimal performance and resilience.
- Ensured the high availability and efficiency of a VMWare vSphere cluster through maintenance and timely application of patches.
- Streamlined the onboarding and offboarding processes, ensuring a smooth transition and minimizing friction.
- Achieved ISO 27001, SOC 2, and FedRAMP certifications, demonstrating commitment to industry-leading security standards.
- Successfully administered an Active Directory domain and orchestrated a seamless migration to Azure Active Directory, enhancing scalability and cloud integration.
- Demonstrated expertise in internet protocols, including DNS, DHCP, HTTP, and SSL, contributing to a robust and secure network infrastructure.
- Applied scripting knowledge in Bash and Powershell to automate routine tasks and reduce manual workload.
- Enhanced endpoint security by effectively securing and responding to alerts using MS Defender.
- Implemented comprehensive security measures, including Endpoint Detection and Response (EDR) and Group Policy Objects (GPO).
- Spearheaded the successful implementation of Mobile Device Management (MDM) and Endpoint Detection and Response (EDR) applications, fortifying security measures across all endpoints and critical servers.
- Orchestrated and led a comprehensive security awareness program, ensuring all employees were well-informed and vigilant about cybersecurity best practices, contributing to a culture of security within the organization.

EDUCATION

DevOps Professional

Technion – Israel Institute of Technology • 2025

- Gained expertise in Ansible, Git, Webservers (nginx & apache), AWS, K8s, Elastic, Jenkins & Terraform.

Security Expert Program

Technion – Israel Institute of Technology • 2022

- Gained expertise MCSA, CCNA, CCSA, LPI, Penetration Testing and SIEM/SOC operations.
-
